

I found this post somewhere on the web. Its thought provoking if nothing else. Gann was into numerology.

In numerology you want to find the number vibration by adding up the digits to bring it down to a single digit. For example if you have the number 2417 you add up the single digits $[2+4+1+7 = 14=1+4 = 5]$ So the number 2417 dances to the vibration of 5.

Now the circle is 360 degrees if you break it up into 30 degrees increments you have 30 60 90 120 150 180 210 240 270 300 330 and 360... now if you break each number down to a single digit then you have a pattern or symmetry working..3 6 9 3 6 9 3 6 9. Now you might say so what. Look at the pattern in percentages of price movement(Read W.D Gann..45 Years in Wall Street}

3.125	=	2	43.75	=	1	84.375	=	9
6.25	=	4	46.875	=	3	87.5	=	2
9.375	=	6	50	=	5	90.625	=	4
12.5	=	8	53.125	=	7	93.75	=	6
15.625	=	1	56.25	=	9	96.875	=	8
18.75	=	3	59.375	=	2	100	=	1
21.875	=	5	62.5	=	4			
25	=	7	65.625	=	6			
28.125	=	9	68.75	=	8			
31.25	=	2	71.875	=	1			
34.375	=	4	75	=	3			
37.5	=	6	78.125	=	5			
40.625	=	8	81.25	=	7			

See the percentages table when broken down to a single digit the percentage move to a perfect Yin and Yang pattern of order starting from Even digit to Odd digits and back to Even and then Back to Odd digits.

Gann mentions in 45 years of Wall Street that the percentages was the one of the greatest discoveries he made.Now lets look at the number 144...

when we bring it down to a single digit it comes to 9..so change of price or time can occur.So the following digits 18 36 54 72 90 108 126 144 bring to single digit = 9 .This applies in time and price. But you must go and back test these numbers on ranges in price,multiples of 144

For example look at the price of the stock when it is at 144 288 432 and so on.Also when the market of a particular stock is say for instance is at 2999 then look for the next resistance or support by adding 144 and wait for conformation whether it will move into the next square of 144

If 144 is too much for that particular stock then do divisions of 144...18 36 54 72....

Study the number 144 more you will find it all ties into square of nine.You then need to go and back test these numbers on past history of a stock on a chart.The answers are all there one needs to put in the effort and you will see and discover more. kind regards to all

Brett

Hello David

Thanks for the email Look at the number 144.if you do a bit of study on numerology to find the real value of the vibration of the number you need to bring it down to a single digit.

So if you add the digits 144{ $1+4+4=9$ }So when a number reaches 9 it has to change back to 1 again.18 27 36 45 54 63 72 81 90 99 108 117 126 135 and 144 all add up to 9 when you bring it down to a single digit.

When you look at a circle it has 360 degrees start from the cardinal points we have 0 90 180 270 360 now all these numbers add up to 9 when you bring it down to a single digit...now the trine points of the circle which is the 45 degrees to the cardinal points which of course is 90 ...

so the trine points of the circle are 45 135 225 315 now each number here adds up to 9....

change occurs so in relation to the stock market go back test time and price .W.D Gann stated then go back test the history of the stock and prove it to yourself that the numbers keep on coming in.Also use time periods of 30 60 90 120 150 180 210 240 270 300 330 360 ..

now if you bring these numbers to a single digit you will see a pattern of symmetry 3 6 9..3 6 9 3 6 9 3 6 9 ...

in regards to % movement in price use the percentage number of

3.125 equals 2
6.25 equals 4
9.375 equals 6
12.5 equals 8
15.625 equals 1
18.75 equals 3
21.875 equals 5
25 equals 7
28.125 equals 9
31.25 equals 2
34.375 equals 4
37.5 equals 6
40.625 equals 8
43.75 equals 1
46.875 equals 3
50 equals 5
53.125 equals 7
56.25 equals 9
59.375 equals 2
62.5 equals 4
65.625 equals 6
68.75 equals 8
71.875 equals 1
75 equals 3
78.125 equals 5

81.25 equals 7
84.375 equals 9
87.5 equals 2
90.625 equals 4
93.75 equals 6
96.875 equals 8
100 equals 1

now you can see the symmetry .But dont believe me go test it out for you self mathematics and Geomtry applied to the market reveals the Truth.

Study study apply and prove it to yourself the biggest obstacle in one life is each individuals human conditioning and flawed way of thinking base on human emotion .

To tap into the Universal Truth one needs to vibrate the same frequencies.....kill the ego embrace your realself {SPIRIT} and hang on for the time of your life.

kind regards

Brett

Re-read the post .Buy the book The Day of Wisdom According to Number Vibration by Mrs .L Dow Balliett. regards Brett

The book is available to read for free on-line at:
