

# **“20 YEARS OF STUDYING GANN”**

This work contains no copyright and may be freely and publicly distributed.

## INTRO

While the idea of doing this work had been crawling around in my head for many months, it was June 9 of 2016 at 4:04 pm that I committed it to paper, later it will be typed. It wasn't until the next day that I realized it was started on Robert Gordon's 110<sup>th</sup> birthday (An important number). If you do not know who Robert Gordon is, you will by the time you finish reading this.

The sole purpose of this work is to help those on their quest to understand the methods and philosophy of W.D. Gann, a legendary trader from the early 20<sup>th</sup> century. I have heard from many that have 10-15 years in studying Gann and they can't yet even forecast consistently. This work will address the issues I feel that may be stopping them.

Luther Jensen, George Bayer and W.D. Gann could all accurately forecast financial markets. W.D. Gann made annual forecasts, Luther Jensen made quarterly forecasts and George Bayer made monthly forecasts. All were just as accurate as each other. The question is HOW? They all found the cause of the market movements (cycles) and used them to forecast. This truly is step one. For it's the correct cycles that allows one to forecast price. Without the correct cycles price cannot be forecasted and any geometry is relatively useless; we will deal with this more in depth in this work.

By definition I am a market trader/researcher and make no pretense at being a writer. This work is meant to instruct; it is not meant to be a literary super novel.

This writing is based on 20 years of researching W.D. Gann while working with some of the most brilliant people on the planet. 19 years of studying W. D. Gann's book "The Tunnel Thru the Air" and 17, going on 18 years of helping others in this field.

It is my sincere intent that this work aids you on your quest to understand the methods of W. D. Gann.

## PHASE 1: BEGINNINGS

There I was, 11 years old, staring at the stock prices in the daily newspaper sensing and feeling the energy, wanting to get involved. As fate would have it a year later I was put on a prescription drug for the control of asthma. While the drug would take away my asthma it also shut down metabolism of vitamin B6 in the liver leading to a mental fogginess which would last 12 years.

It was at the age of 24 I flushed that prescription down the toilet, despite my doctor's words that I could die if I got off the medication. When my liver started metabolizing B6 I literally woke up and things became clear again.

At the time I was in college and began asking myself what I really wanted to do with my life. I remembered back to when I was younger and realized my TRUE passion was for financial markets. That is where the action is and deep down on an intuitive level I knew its where I had to be.

I had taken many college courses at the time and gotten into arguments with some of the professors. I recall my business administrator teacher instructing the class on how to incorporate, which I had already done over a year earlier. In fact, I had owned many businesses before my 25<sup>th</sup> birthday. My problem which I voiced in class was the way the professor was teaching it. One would pay a lot of unnecessary taxes. In the state I lived in, issuing NO-PAR stock would later circumvent, legally, those taxes. See, on stock one has to pay taxes on the amount. NO-PAR is equal to zero, so one pays no taxes. The professor, with NO experience in REAL business, squeaked me by with a D for the class, although I had YEARS of hands on business administrative experience! Something was wrong!

Later I had developed a good rapport with an English Professor. She would allow me to teach certain aspects of the class, which I found thrilling. Then one day I was turning in my test, and she looked up and said "Can I ask you a question; what are you doing here?" shocked, I searched for the right words but admit I was confused. She then followed with "This college is doing nothing for you, you belong at Harvard or Yale." I smiled and left college that day never to return. Although I don't recall her name her face after several decades is fresh in my mind. I decided that day to devote my life to financial markets and not waste another second on college... Sometimes people show up, when we are on our paths, as "unexpected" guides. To that teacher I want to say thank you for the best information I ever learned in college! It would be decades later that I would learn where our education really comes from and what it is designed to do.

I got my first library card in my mid 20's and started to go regularly. Checking out the maximum amount each time. I began reading variously about financial markets and related matters. In no time I had exhausted the local library's 60 + books on the subject. I acquired the usual subscriptions; Forbes, WSJ, Barons, Value line etc. I began acquiring books from financial market traders like Jesse Livermore and Benjamin Graham along with more current traders.

I began trading mutual funds primarily tech funds and pocketing 40-60% gains which at the time I thought was impressive. Finally, it was time to take the plunge and begin trading actual stocks. I started out with a cheap charting software that came packaged with other software in the back of a book, if memory serves me correctly it was entitled, Global Investing. Metastock was also included in the back of the book. Before long I fell in love with Metastock and switched over, that was back when they were awesome, decades later I would have to change again.

Metastock, at that time, came with something called “Gann Angles” which was OK, but geometry was never my thing. It would be awhile before I would find out that geometry is only say 10% of Gann’s system, more on this later.

## PHASE 2: HIGHS AND LOWS

I would say in my mid to late 20's I was a value investor, and in a rising market as long as the rise continues, its easy money. While I was finishing up my “library days” I ran into the Beardstown Ladies who were in disguise. At that time, they were hounded by people wanting to know stock picks, which is why they were in disguise. The method they used was also value investing. I happened to be at the Xerox machine at the same time as one of them so I said in a soft low tone “you are with the Beardstown Investment Ladies?” Shocked she looked at me, sizing me up and down for a second, then smiling she stated “you are very smart.” She then showed me what she was Xeroxing. It was MBNA which was later acquired by Bank of America in 2006. To answer a question, you may have, yes the stock did go up after she told me about it!

In order to trade I had to buy a computer and open an E\*TRADE account, thus bypassing the brokers. E\*TRADE at the time was DOS, with a clunky call in feature. Overall I would say I had above average profits from the value investing and had definitely caught the trading fever. Never one to remain idle I then began studying stock options. Unique little things that allow one to use leverage. After reading all the books I could get my hands on I developed over a few years a simple trading strategy, which I will share with you here. First you have to know what your market is going to do, is it going up or down? Let's say down, so in this case you would want to do puts. Your stock is selling at 92, my system is to buy the puts just outside the money, NEVER in the money. So I would buy puts with at least 3 weeks of life left and in this case, the strike price would be 90 (just outside the money). I said 3 weeks of life left, as a minimum, but not over 5 weeks, for me that has always been my “sweet spot”. Over the year's people have asked me about different options, strategies and models. My response has consistently been; “Those are for people who do not know the direction the market is going.” Back then though, in my mid 20's, I did not have this options strategy. Options, like so many other thinks in life require experience, which of course requires time and I had been doing light trading in them. I then took the plunge on CSCC, Cascade Communications, buying about 10,000 dollars' worth of PUTS far out of the money. The PUTS were bought on a Thursday and Friday. Saturday night I began getting sick with some sort of stomach flu. I was bed ridden with it Sunday and Monday. On Tuesday I mustered enough energy to get out of bed and check on my options. My 10,000 was down to under 2000. But, and this is key, Monday the options had been up to almost 100,000! What had happened was bad news had come out Monday morning and Cascade shot down 20! Then the company came out Tuesday morning and corrected the earlier version! Most people would view this as “bad luck”, which in reality does not exist. In fact it would take me about a decade to realize the natural law which had truly caused me to loose that trade. Each trader has a trading frequency and when he/she steps out of that frequency range by putting on oversized trades, he/she will usually, almost always, loose. More on this later.

I was 28 when I did the Cascade trade. It would be 2 years before I placed my next trade as I had lost my nerve.

It was the year before this trade that I had learned about my uncle's success. To make a long story short I also learned Gann was the way to go. My first books arrived simultaneously 19 years ago. The Tunnel Thru The Air by W.D. Gann and Astro-Cycles and Speculative Markets by Luther Jensen. Little did I know it at the time but these books would change my life forever, taking me to places I once would have considered unimaginable. A decade later I would discover that Luther Jensen worked for Gann from about 1930 to Gann's death in 1955, at which time he took a break for a couple of years then worked for a Wall Street firm in the 1960's. Jensen actually died at his type writer. He was a very prolific writer/researcher and yet in the public Domaine there remains less than 10 writings. This does not include his quarterly forecasts in the "Astrological – Bullitina." Jensen died in 1980 and I was able to obtain private correspondence between him and the guy that talked him into writing his book. One has to wonder though, where all the other typed information went.

I knew when I received the two books (Tunnel and ACSM) that I was looking at TRUTH and I also knew deep down, on an intuitive level that I was also looking at many years at research. I must admit, like so many other the reason I looked Gann up was for the money. What I later found was even more important – FAR more important.

I knew that astrology (more accurately a fusion of astrology and astronomy) was important along with numerology in solving for the knowledge contained in the book of Tunnel.

Because both Gann and Jensen had passed away by the late 1990's I then began a search for modern day Gann Traders that were still breathing oxygen. That is when I found the works of a guy we will call Geometry George. I studied those works day and night... literally I recall looking up and the sun was out, looking back up and it was dark, then looking back up and the sun was out. Days seemed to roll together. After about a year and half I finally contacted the author figuring I must be stupid because I could NOT make it work with any consistency. The author then pointed me to a place where people were coming together to meet and discuss the authors work. There must have been a hundred people there and not one could get any of it working. That is when I realized it wasn't me or my disdain for anything geometry. There was people there that were masters of geometry and could not forecast at all. I would later find out, through a mentor that "some people spend their entire lives making Gann difficult." You see, here is the rub; Gann is not difficult at all, in fact it's EASY, it's just well hidden! A question could be, in looking back, am I upset about the money I spent on Geometry Georges books? Absolutely not. It was at the time the logical next step on my PATH. Gann is a Path that must take YEARS. Only those that put in the dedication will succeed. The reason for this is Gann must be learned in layers over time. Like I could write the exact methodology for forecasting inversions right here. Few if any would know what I was saying, fewer still would be able to apply it.

In talking about the late 90s I also want to add something that some of you can relate to. I had lost my trading nerve (Cascade options trade) and was deep into research. Everyone thought I was crazy, always researching. They thought because I had only a part time job, which would enable me to research, that I was somehow dodging life and dodging my responsibilities. After all, who researches outside of college, who studies outside college? Back in those days it was only my wife who saw my dream, who saw my vision and who understood. Two books not related to Gann that really helped me through that time are by Mark Fisher. "The Instant Millionaire" and "The Millionaires Secrets: Life Lessons in Wisdom and Wealth."

I am writing this part of this work in Jekyll Island, Georgia, at times looking out over the ocean. The sand here reminds me of Australia's Gold Coast, same color and feel, with less waves. Jekyll Island is more reclusive, less people and more remote than Wrightsville Beach thus a great place to write one's thoughts!

In this work I will suggest books on various topics. There is no affiliation, as these are all books that have helped me and others succeed. If a book is mentioned I encourage you very strongly to acquire it and have a read through it.

Losing most of my trading capital really crushed my ego. There I was having left college to fulfill my dream only to fail through making stupid trading decisions and getting a strange flu. I think that would have permanently crushed many but in my case it made me even more determined to succeed. I really had no choice, my back was against the wall. It was either follow my passion or go get that "desk job" my parents were advocates of. The thought of abandoning my passion was almost too much to bear, so I pressed on. I could not have lived with myself had I left the field of financial markets. Later I found out that Gann himself had a rough go when he was starting out several times losing all his capital.

It was around age 31-32 that I really lucked out. I found someone who was out there helping others AND could demonstrate they really knew what they were talking about. That was my first, not my last, encounter with someone that really knew. It was, through that, I found out the planetary cycles are cool but there is this level above that called the "Law of Vibration" that researchers need to work towards. Of course an arrow only finds its mark when it is aimed through an end goal (target). I had not really been able to aim my arrow as I was unsure of the real end goal. That all changed that year. I was shown exactly, in advance, what it (L.O.V.) could do. I was also shown that a real Gann trader could make a return of thousands of percent a year (The proof Gann was doing this is in many testimonials who talked about his incredible ability to compound money--even auditors talked about this). I was being shown this from people who had studied for years and were not selling anything! More importantly it was emphasized to me that Gann wanted people to spend a decade working on it before they get it. At first I could not fathom that concept, later I would learn it was because Gann knew the natural law that governed it. Here it is explained, below.

In simple terms we reap what we sow. This law cannot be circumvented, although at times it takes many years to catch up and have an effect, it will always! Given that, in a nutshell, if we spend our time in research and study we are sowing the seeds for our future. If we enter this field by begging someone to give us all the answers, we will fail. Why? Because we are attempting to reap what others have sowed. This is an attempt to get something for nothing and thus these people generally wind up with nothing for something. This is why Gann did not share his methods with his son, John. Had he given his methods to his son he would have received something for nothing. The universe DEMANDS payment. Nothing and I mean nothing is ever free.

Let's say a thief breaks into a house and steals 6000 worth of equipment. And let's say this thief is never caught. The universe will demand 10 times this amount! So years down the road the thief gets into a car accident and the medical bills total \$58,750 dollars. The thief wont realize the connection between what he stole and what he spent on medical bills, so he will undoubtedly never discover the natural law. The Bible talks about this in the form of tithes. Giving away 10% will yield you 10x down the road. Always remember the universe demands payment. Gann figured that 10 years of research was

enough to square it, for a Gann Trader. This concept, presented in this paragraph is incredibly important to fully understand!

Many are drawn to the field because they see quick riches. They do not realize in this universe, operating off of very specific laws, there is no such thing. A price must be paid in advance through research and time or it will be extracted through natural law, down the road.

It was also around this time age 31-32 that I met one of my best friends. We will call him PA as he has been like a father to me in this field, at times. PA was trading at one of Australia's leading banks. He was trading a multibillion dollar account, at the time. When he first came to visit me he told me that someday I would be taking 60,000 dollar vacations and that money would seem like monopoly money. Admittedly, at that time, I thought what he was saying was unfathomable.

### PHASE 3: THE WILD WEST

It was around age 31-32 that I was made aware of the fact that Gann put all his methods in the book; "The Tunnel Thru the Air". I mean I always knew it was important but did not realize it was the major key. I was also informed I would need the market data, from that era, to solve it. Later I would find out this is absolutely true. I do not see how it is possible to solve Tunnel without the data, maybe it is, I just don't see how. We will be dealing with the book in far greater detail, very soon, but wanted to leave you with the age of 33; I had probably read Tunnel cover to cover about 10 times and I just didn't get it, I mean it was important yes, I got that, but what did it really contain? To be really honest I had no damn idea. Many people entered my life around this time, one would wind up being a master Tunnel decoder.

In the 70's and 80's, before the internet, it was very difficult to learn Gann because no one was really around to tell people "Hey! Study the Tunnel Book!" So many were left on their own. Those that knew the methods were tucked away, happily trading. You see, the realization that the truth is in the book Tunnel is fundamental, without that, one is lost within the field. In the 70's and 80's there was really no one around saying that.

For me a benefit of trading markets was that I did not have to deal with people, it would be just me, the computer and market profits. I wound up helping others and in all honesty learning about something I never dreamt I would; PEOPLE! Little did I know at the time that in dealing with others I would find out exactly what stops many from succeeding. Over the years I have heard every excuse known to man and no I won't be listing them here...It all boils down to INCORRECT MINDSET. Studying Gann requires a sustained effort lasting years. This runs counter to the current society's attitude of reaping with little sowing. Somewhere along the way we need to pick up success training if we are really going to succeed at anything. This training has been left out of the traditional curriculum. Now I know what you are thinking; "OK so this writer is going to teach me how to be successful." My response to that would be no, I am not, and the reason is there are far better teachers out there. One of the best, by far, is Napoleon Hill. You have probably heard of the book "Think and Grow Rich." What you may not know is that "think and Grow Rich" is actually advertising for the book "Law of Success in 16 Lessons." (If we are going to succeed we must learn about the Laws that govern this universe). You have heard it before and you will hear it again This universe is based on very definitive Laws, success itself is based on laws. If you are unfamiliar with the Laws, success will allude you.

I am a big fan of audible.com, now an Amazon company. Audio books can be listened to at various times when reading would not work, like when driving a car. Given that, get the audio file: "The Science of Personal Achievement" by Napoleon Hill.

A good trader friend of mine also felt the book "Outwitting the Devil" by Napoleon Hill, changed his life for the better so it is also mentioned here.

Here is the rub. So many come to study Gann because they feel that money will make them happy. This brings up a conversation I had with PA. I had asked him if most of the traders up in that bank where multimillionaires and he replied emphatically "Yes". I then asked him how many of those multimillionaires were truly happy. He kind of contorted, then said in a soft but firm voice "very, very few." You see, money is like a treadmill, the more you acquire the more you want. If you are making 100k a year, making an income of a million appears like a good goal to have. What happens is that 1 million won't change the fundamental thinking. You will have more expensive things, but the debt and headaches will also be there, magnified!

Way back in my early 20's I ran across a saying that has stuck with me even to this day. It goes something like this "I chased the goddess at money and she would not smile on me, I tried and tried. I then gave up and began to chase the goddess of knowledge, this made the goddess of money jealous, and then she smiled on me." What most do not know is that Gann did not spend his time chasing money, he spent it chasing knowledge. Wealth always follows knowledge.

It was about this time that I started to acquire the market data for the 1920's and 1930's that is needed for Tunnel. In some cases, this involved me and my friends pain stakingly searching through microfilm to get the daily high and low daily data. It goes a lot faster if you have people helping you. Another thing we had did was track down the magazine Luther Jensen (Gann's Assistant) had written in from the early 1930's to 1955 called "Astrological Bullitina". We found this to contain additional information above and beyond what can be found in his book "Astro-Cycles and Speculative Markets" which we now call ACSM for short.

Meanwhile the revolving door of people entering and exiting my life for various reasons became much faster, more people coming and some leaving. One of these individuals, whom we will call "Cowboy Carl" was taking page numbers and looking for codes in Tunnel. Granted there are some there for sure, but the key is you have to work them a certain way. Like as an example around page 225 in Tunnel there is a cycle described, and that is not coincidence. Now Cowboy Carl, he seemed to have his own method which was pure number. He had informed me that his wife would not permit him to deal with any Astro at all. (This makes Gann almost impossible to understand). He would write me all these page numbers and crazy connections that did not make any damn sense. Like if I take my shoe size and multiply it by a completely random number I get page 84, which then points me to page 136. Some craziness such as this. The last email I received from him he stated he was becoming paranoid about his work. That was the last I ever heard from Cowboy Carl, but we can learn from him here. Page numbers in Tunnel DO correlate with a code but the code is not random and MUST be tied into elements that are repeated in the book. See at this point I had learned that important parts or points are repeated. An example of this is the Tele-Talk which was deliberately invented twice. You need the Tele-Talk, you need to have it working to truly understand L.O.V. So there is an order, a technique, if you will to the coding. Learn the techniques and Tunnel is not so hard.

We will be dealing more with this book very soon. For now, make sure you have 418 to 420 pages in your Tunnel book. If you only have slightly over 210 or some other number, the coding will NOT work, you are wasting your time!

#### PHASE 4: WORLD TOUR

The initial idea hit me when I was floating around my pool soaking up the Sun when I was 35. Why not actually meet people? I mean I had had people to my house since I was 31, some were even ex CBOT pit traders, but why not really get out there and meet people. I mean I am not going to invite 50-100 people to my house. There was just one problem. I had only spoken publicly once, in the 7<sup>th</sup> grade, and that did not go so well!

Melbourne Australia was chosen for the first seminar, not only because I had very good friends there (and still do) but also because of its symbolic importance in Tunnel. I knew who to get into contact with to make this all happen, and to all of them that worked to make it happen I again want to say thank you as the experience was a definite stepping stone in my life. I don't recall an exact final number of attendees but it was well over 50 with some flying in from other countries to attend.

I think it's time to go in, Sunrise over the ocean is always a beautiful thing, when all the possibilities of the day hit you. Then the sun continues to rise, the heat kicks in and the pages I am writing on begin to curl due to the humidity.

For those that have never been to Australia it is a beautiful country. The people there are outgoing and happy with a "vibrancy" about them. The only parallel I can make is the "vibe" is like the U.S. was back in the 1970's. They eat really nutritious food there. Anyone that has done any travelling knows how fresh and tasty the food in other countries is. Lettuce tastes like lettuce, not the cardboard found in the U.S. Their adrenal glands, due to the nutrients in the food, are still functioning at a very high level. Our adrenals produce hormones which are vital to our vitality, you shut down the nutrition, the adrenals cannot function and you lose your "pep".

Ok, so let me put this into perspective for you. There I am, supposed to start speaking to over 50 people in a foreign country I have never been and without any previous public speaking to back me up. Well, I will never forget walking up to that podium. This would not be the only time in my life when my back was up against the wall, but it would be the first time I would do it with over 50 people watching!

I'm sure it was due to the eagerness to learn from the attendees that I was able to pull everything off! They were excited and asked many questions that I felt showed they were following along. I am grateful to all of them. Afterwards people would come up to me showing me their marked up Tunnel books from years of research. These people were awesome and I can say I am friends with about a handful of them to this very day!

As news of the success of that seminar spread, thanks in large part to the wonderful attendees, I began receiving requests to do them all over the world. My next one was scheduled 4 months after the first one and in America, then one about 3 months after that in Europe. Everywhere I went I met the most amazing people. It was fantastic! Although currently retired from all of that, I would wind up,

unknown to me at the time, doing the touring for many years. To be completely honest I loved Australia so much that I would generally stay over there for close to a month, soaking in the sunshine on the many beaches I visited at the time. Eventually I would get burned out on all the traveling, settling down more into family life.

There are two things that stand out about my 36<sup>th</sup> year of life. One is meeting a Doctor we will call Dr. Wise. The other is a discovery I made that is critical to all traders. The principle of it is that there is a relationship between the stock or commodity/currency you are trading and yourself. Meaning there will be some instruments you won't be able to make any money out of!

It all started like this. I pooled a couple hundred people I knew to see if they would tell me about their bad trades so I could study their personal cycles in relation to their losses. I became inundated with emails, like a massive wave. Out of those about three people wrote me that they could trade a single instrument successfully. I figured that would be a great starting point. I then went back and interviewed all three, seeing what kind (size) profits, what tools they used and their general trading knowledge. I also asked for their natal information, which they happily provided so that I could look at how they were "linked" to their particular trading instrument. What I found shocked me! These guys were using things like "moving averages" and making nice income. They had no real knowledge of Gann's techniques and what they were using could best be described as a "gut feeling" to trade. But, and this is the key, their success was only applicable to one instrument, the minute that they deviated and traded something else, losses quickly followed! This meant it was instrument specific!!! As long as they traded that one specific instrument they were almost always profitable. For W.D. Gann, that instrument was Mex Pete, Mexican Petroleum, in which Gann states "I was almost always profitable in it, it was like I was making the marks myself." Both Gann and Bayer specifically state to stay away from stocks etc. that you have not been profitable in. Gann himself states that there are some stocks he has never been able to make money in. That is saying a lot!

My time was spent developing systems to test this so that others could find a stock that is profitable to them. My study reveals about 1 in 30 will be good for the trader. So if you try 30 different ones you should find one that is pretty consistent as far as profits go. Taking 3 small trades in them and you should have at a minimum 2 good wins and 1 small loss, if not all wins. The tool used is your "gut feeling" on what that instrument is going to do.

Later I would develop paper trading techniques that also get one results for finding their "lucky trading instrument."

About a month ago a trader friend reported he had 30 trades on his lucky currency with only 3 small losses, this kind of news is typical from those who look into it. Some find their lucky stock or index and literally retire, saying they have found their personal ATM machine.

Around this time frame I began having health problems, which I attribute to the standard American diet, appropriately nicknamed SAD. Finally, I went into get tested and they put me on like 8 different prescriptions and an appointment to see a heart doctor. I took the prescriptions once and flushed them.

I walked into the heart doctor's office and there were all these people in like their 80's and 90's who looked at me like I was crazy for being there in my mid 30's. He ran all these expensive tests, costing

thousands of dollars and could find nothing at all wrong. His advice was to move to Paris. Straight out of his mouth that is what he told me!

Here is what happened. Doctor #1 which I have called "Dr. Death" for years; told me to get on a no fat diet. Then later I was tested and all my numbers come back "Sky High". I then went to Paris and strictly against Doctors orders ate all the high fat foods they offer. Came back to the states and got tested by the heart Doc. My levels there came in normal. Well I had to use Gann research techniques on health to find the cause. In the absence of fat in the diet the body takes in carbohydrates and stores them as triglycerides, inflating all the numbers. When I went to Paris the fat famine was over and the body dumped the triglycerides. Dr. Death was subsequently fired. Years later she appeared in all the newspapers, the feds got her on fraud and her husband was arrested for cocaine possession. Shortly after the imaginary "health scare" I met another doctor who called me on the phone and wanted me to help him with Gann. Few know this but in America the average age of a Doctor at their death is 56 years of age! I was sick of doctors and here I had another one on the phone, asking for my help! To be honest I almost hung up on him until he said "no, I am not one of the bad guys, I am a Naturopathic doctor." I told him about my asthma that I had since childbirth and he said to come out to Boston and he could cure it in  $\frac{1}{2}$  hour. What? There is not cure for asthma! My parents thought I was crazy but a few days later I was on a plane heading to Boston. I would not know what he looked like, so I could identify him in the airport, he would be carrying the orange book "Tunnel Thru The Air" which I saw very quickly. We shook hands he took me to a hotel and said he would be back the next day.

The next day he took me to his office. He had cleared his appointments so it was just me, him and a secretary. The phone was ringing off the hook and his secretary was telling people he was booked up, for the NEXT 2 YEARS! He then took me into his office where there were pictures on the wall of him with Princes from other countries, Dignitaries and a Supreme Court Justice, whom he was best friends with for 20 years.

He gave me some natural herbs which he got from the pharmacy he owned downstairs and the asthma went away just like he said!

We went out to lunch and he explained that he had spent millions on "Gann Stuff" and I quickly deduced he could still not forecast. With my usual researcher inquisitiveness, I changed the subject and began to probe him about his story and what he actually does.

Not yet written here, his secretary, when we were back in the office, had come up to meet me. She told me that the Dr. had cured her bedridden mother of MS by slipping certain herbal mixtures into her while she was in the hospital. That testimonial combined with my relieved asthma condition, the pictures on the wall, something was going on here and I had to get to the bottom of it.

When I began asking questions Dr. Wise informed me his specialty was cancer. He said he could cure all but 4 types of it. Naturally I asked him why he could not cure the 4 and his response, with a sullen look, was "I am not hitting the right receptors." He then went on to state that traditional allopathic medicine in the U.S. is all fraud and that the cures are already here but are suppressed, so that the "doctors" can make all the money they can. I asked him how he learned his trade and he said he was a graduate of Bastyr University that when he was there the average age of his teachers was 86! (Recall in the U.S. the average age of an allopathic doctor at death is 56) This is simple natural law. You see when you help people, TRULY help them, there is a returning flow! When you scam them or are a part of a

larger picture that does not really have their best interests at heart, there is also a returning flow....but it isn't good!

Dr. Wise would go on to tell me how things really were and that the public had no idea of it. He knew people who knew TRUTH, not about markets but about what we will call, the real world. He also started explaining his theory on quantum physics over dinner. I had no idea what the guy was talking about, I am not that smart.

Then he really blew me away. He took me home to meet his family and we went up in the attic. There were rows and rows of boxes, stacked 6 feet high (2 meters) and 9 feet long. These boxes were filled with ancient manuscripts and scrolls. I was stunned. Never one to be over staged I showed him a cycle that we were using. One that I called the "old type" now because there are better cycles. He was floored. The only problem I had with that type of cycle was that I never could get the inversions 100% squared away. Gann supplies a better type of cycle with an accurate inversion solution in his Tunnel book.

As my time with the Dr. was coming to a close I invited him, free of charge, to my next seminar which would be held on the East Coast. He said he would be there.

The Dr. had devoted much of his life to studying Gann and because he had also developed good energy by helping people, natural law HAD to repay him in kind. He said he had been searching for years on how to get the natal of a stock using the data and when he saw my method he "wept tears of joy." Which made me very happy to be helping someone who had helped so many.

Around that time my Tunnel studies had been bearing more fruit. I began understanding that Gann's cycles are coded in Days in that book, although there are a few yearly references.

Unbeknown to me at the time, my personal success cycles, were on the upswing for the next few years. One would turn down in 2009 for a few years which would make my personal trend sideways for a while, but that was still off in the distance. More good things were to come into my life.

A couple years before I had started to study numerology. And as anyone who has studied such can attest there are all these different systems for different languages. The reason is that each language has its own resonant frequency and so a different interpretation or Kabala. I speak English so I need the English system, where A=1, B=2, C=3, D=4, E=5, F=6, G=7, H=8, I=9, J=1, K=2.....Z=8. If English is your native tongue, this is the system to use. Numbers govern vibration! But back in these days around my 36-37<sup>th</sup> year of life it would be a couple years before I knew how to use it. I am sure we will revisit numbers soon in this work.

My East Coast Seminar went off without a hitch, everyone loved it and we all learned much. Dr. Wise showed up and people came running up to me saying "Do you know who you have here, this Doctor is world famous." I smiled and nodded my head. There was an "electricity" in that get together that was just incredible, so much so I got a little teary eyed when it ended. I also was given a cycle prototype, when it was over, from a mentor. That would transform my life because this type of cycle had an inversion solution that was close to 100%, meaning you could gauge when it was going to invert in the future. (Gann himself would miss 1-2 inversions a year BUT you know exactly where the tricky ones are, you simply avoid them in trading!) In this regard I would say to study the Demon of Death very carefully

in Tunnel. Gann actually writes a lot on inversions in Tunnel, going to great lengths to deal with them, but like so many other things its really useless without the cycle.

In being completely honest it took me a couple of years to master the radium ray.

Tunnel, which we will be dealing with more in depth, is written in layers like an onion. It takes a while to peel back the layers one layer leading to another. Gann knew that originally people would study his works for trading purposes; to procure more money. What most people do not understand is that while you are studying the book, trying to improve your trading you pick up knowledge. Then, as you accumulate more of this knowledge you realize, at some point its far more valuable than dollars!

Here is a small example; we all went to history class in some sort of “school”. But nowhere in there was Atlantis mentioned. Many “scholars” believe it was a myth. The “researchers” know better. The difference is the researchers have rejected the schooling and have spent many hours researching it. Gann wrote in Tunnel that the wonderful inventions the Atlantians had are due to repeat. He states this on page 76, which is an important page number. People have all sorts of opinions and their opinions directly affect their lives.

The truth is like so many other things far different that we were taught. Get the book “The Lost Continent of MU” by Col. James Churchward, for a start.

Although it would not be the last time I saw him, Dr. Wise disappeared without a trace. The office, the pharmacy everything was gone in a flash.

## PHASE 5: MELTDOWN

My friends had known in 2006 that a market meltdown was coming in the fall of 2008. Earlier in that year I was over in Australia and I leaned over to a guy that was talking about long term predictions and I said “I got one for you, watch what happens in late summer/early fall this year.” Then I cracked a grin.

The warning signs had begun to form in early 2008 with the collapse of Bear Stearns, I recall that day very well, I walked downstairs at a hotel I was staying at and was having breakfast with a money manager. He was reading the newspaper sipping his coffee and showed me the story. I knew at a glance this was the first domino of a cycle that was due in the fall. The cycle that was timing this was not of planetary origin, although the planetary cycles timed the points. That’s how Gann’s systems on time work, they complement each other. One generally starts out using solely the planetary systems then moves on to Gann’s other systems. Some attempt to skip the planetary systems but I can honestly say I do not know of anyone who is a success and has skipped the planetary systems. Two of Gann’s three price systems he describes in Tunnel are IMPOSSIBLE to operate without the planets. One needs to know how to square out price with the planets. Study the “Tunnel Machines” especially in Detroit.

Over the Spring I continued to watch the entire saga unfold and at some point, I can’t remember, I pulled my parents out of stock funds and put them in bond funds. This proved to be a fantastic move, which really helped their retirement funds. The market continued to weaken throughout the late Spring

and early Summer. You can usually gauge this by running an “accumulation, distribution” line on the DOW, or any of the major indexes. Money was clearly being withdrawn even before the collapse.

Around this time, and knowing what was coming, my friends and I began acquiring physical silver and other metals. We would sell out at the top in 2011, but that was still years away. ALL of Gann’s cycles are based on past repeats. Like here is a simple numerical connection with the War of Independence in 1776, Civil War 1860’s, World War II 1940’s and the next repeat in the 2020’s here in America. Again, ALL of Gann’s Cycles work off of repeats of the past, no exceptions, Ecclesiastics 1:9.

Two gentleman had asked me for private tutoring. I agreed to meet with them both over the course of a weekend, for some Gann Training. Both men were at the table with me at the same time, receiving the exact same training, meaning they were taught the identical same thing. One of them took the system, retired, making a 6 figure income from trading. The other could not get it to work. My attention began to shift to the one that was unsuccessful. He flew back in for additional training, appearing “spaced” and unfocused. When he left I did several follow up phone calls with him to no avail. Finally, the woman he was living with said “He does not want to take your call.” I had been providing the additional training at no additional cost. I was, at the time, confused. How could one succeed and not the other? I mean if both failed the fault would have been with the system, but that was clearly not the case here.

I was, at the time, unsure of the cause but knew one thing for certain, I did not want to feel like this ever again. It would be a couple of years until I would understand the reason; why one person can succeed and another can’t. So for the time being I started to turn people away from any real help in the Gann field.

That same year I had also bumped into a character we will call “Insane Wayne”. This guy appeared to be a true seeker, he had the drive and eventually came into some genuine Gann information not written by me but from someone who truly knew. Paradoxically Insane Wayne seemed to be able to find information that proved the correct information he had was bogus! I was stunned. I told him it was correct but he was insistent that it was not. He had managed to disprove truth, at least in his own mind! The very last I heard of Insane Wayne was that he had bought international plane tickets for himself and his family which were non-refundable and showed up at the airport in the nick of time to catch the airplane, without their passports! Indeed, Insane Wayne was vibrating to failure! More on this later.

I had been trading U.S. Steel Options and managed to catch a “huge chunk” of the down move.

I knew the point that the fireworks would start, it was when the DOW hit a certain price from the line coming down from the top. It got within 40 points of it, turned and shot down 777 points. What we had been waiting for was here! Most people I knew were loaded up in PUT options which were doubling or tripling on a daily basis. I recall sitting down in a chair, turning on the TV, it was a Friday and I almost never buy options on a Friday. I saw the DOW was up 287 points, I mean after all these years I still remember the exact amount. I thought to myself “that is too fucking high”, that was my exact thought. I ran in and bought more U.S. Steel Puts cause the cycle low was not due until about the 8<sup>th</sup>. After I bought those Puts 95% of my trading account was in U.S. Steel Put Options. I no more than got the trade confirmation went back in to sit down and noticed the DOW had turned negative! That Monday those options more than tripled. I am looking at this huge percentage gain and decided to sell out everything

before Mondays close. The low came in on Friday so I did miss a bit of the last of it, but hey, I did not complain. I continued to trade well until the following April.

#### PHASE 6: SHOCK POINTS

The human body is designed to live to be slightly over 120 years. Therefore, the shock points of FA and LA occur at slightly over 40 and 80 years of age.

There are certain points in your natal chart that when they get hit by transiting planets will consistently produce losses. One of these points was getting hit in my chart by a very slow moving planet. My last options trade was in April following the 2008 melt down. The trade was in SLV and I knew it was going down.. I jumped on to place the trade and my wife burst into the room, somehow I paid 4 times the market for the options. Next error in that trade was that SLV double dipped, my friend got out on the first dip with sweet profits and I held on for the second dip. What would have been a good trade wound up to be a scratch. The options weren't worth as much on the second dip. I realized that my personal trend had changed so I closed the trade and did not trade options for the next 2 years. There was just too much going on in my personal life.

My numerology studies had begun to bear fruit.

There are 2 master numbers that each individual has. One is their "inner birth number" which is the day of birth. Like if you were born May 6 1961, the 6<sup>th</sup> is your inner birth number. The other critical number is your name number. You add up your name. Like if your name is John. J=1, O=6, H=8, and N=5. Adding those numbers together you get 20. You use the name that people call you. Like if your birth name is Michael and everyone calls you Mike. You are vibrating to Mike, so you would use that. I had added these up and noted that my birth number, a beautiful number was NOT in harmony with my name. So I changed my name. My old name was of the nature so as it would attract people such as Insane Wayne into my life. The new name would create a harmony allowing me to live a much fuller, richer life. The Bible is filled with name changes and in some cultures today when someone is sick they change their name, which alters their vibration. Warning!! Do not change your name unless you know of all the ramifications of doing so, after years of study.

My old name had attracted many inharmonious people into my life. It's not that they were bad its just that for the most part they did not see things the way I did. According to the rules of a name change it takes about 3-4 months for the vibration to switch over and you begin getting the new affect.

Remember that "shock point" I said hits you around age 40 or slightly after. Well even mainstream knows about it, not the cause but the affect, known as mid-life crisis!! Sometimes things get worse before they get better What I had actually done is switched from and inharmonious name to a harmonizing name. Many people would need to leave my life in order for harmony to come into it. All of a sudden I was the "bad guy". Just like Frank Sinatra, when he was going through those years, no one wanted to have anything to do with me. Friends were few and far between.

My wife began acting strangely and I needed help in this area. A friend, one of the few I had at the time told me he was going to buy me a "manifestation" which is something I did not really believe in at

the time. I got an email saying that the manifestation had been completed (whatever that meant). The next day Dr. Wise called saying he had been meditating and felt the urge to call me. He had disappeared 2 years prior. He was familiar with what was going on with my wife. Saying if I followed his instructions, exactly, that she would be cured. He then ordered me out of the environment. I will tell you, leaving a family is one of the hardest things one can ever do in their life. I slipped out in October under doctors' orders and did not return until the end of January. The plans were to stop off and see one of the few friends I had at the time, then off to a resort for an, as yet, undetermined time. My friend had a guest room and bathroom in one wing of the house so he insisted I stay with him and his family, which to this day I am very grateful for. I passed my time by helping my friend and his family on many levels. I wanted to leave them all "better off" than when I came. He went from "heavy losses" to an accuracy he later told me was "just below 100%" a couple of years later. One of his major problems was putting trades on that were over 10% of his trading account. An individual has a "vibrational trading range" and breaking that range often leads to losses. I was just talking with a guy, 2 months ago, that could make consistent profits by putting about 3,000 into a trade, but when he would put 6,000 into a trade he would lose. This is because the 6000 is outside his frequency range. Instead of jumping from 3 to 6, he could go from 3 to 3.5, SLOWLY, increasing his range. Think about it. If you are making say 100K per year you could probably get by asking your boss for a 5k raise. But if you asked for an additional 100K, doubling your income, your boss is going to find it "humorous" at best. It's too far outside your vibration. Now you could, over time, work your way up to 200K, but to jump up to it isn't going to happen. All vibration is governed by very specific laws.

Gann would never trade more than 10% of his account. My friend at the time had trades in excess of 30% and we put a stop to that! He began to "micro-trade" putting only 2-3% of his account in a trade and slowly increasing that amount over many trades. IMHO you don't want to be at 10% until a couple hundred trades have been taken.

I got the call to return home at the end of January with the goal of getting the wife out to Dr. Wise in Boston area.

Cycle wise, even though I was under the mid-life crisis cycles, one of the personal success cycles had topped the year before and was pointing down for a few years, one of my other personal success cycles was still on the upswing, so this would create a sideways trend for me with a downward bias. Being into Astro like Gann was, I knew I just had to hang in there and ride the storm out.

Getting the whole family out to the Boston area was a logistical nightmare but I pulled it off. At a time when friends were scarce there was my good friend Dr. Wise! Now of course you are wondering what happened to him in those 2 years. The story he told me read like a blockbuster movie script, so much so that I cannot share it here except to say, even if you are a doctor with a license you can't go around curing cancer. Dr. Leonard Coldwell who practiced in Germany has an audited success rate curing Cancer patients of over 92% across 30,000 terminal patients. In America the success rate of chemo, radiation and surgery is 3%! Let me ask you dear reader, would you trade a 3% system? Coldwell has been shot at (has the bullet holds to prove it) and has had his car blown up. Generally, you don't see that type of behavior in an automobile.

Dr. Wise invited me to watch as he dealt with my wife. I won't write the particulars here as some readers aren't ready for it. What happened I did not believe in originally until I saw it myself. That day in that room with my wife, myself, Dr. Wise and his assistant, my life changed. This would lead me down a

great road full of more understanding in a hidden area of life. Here I am, years later, writing this with my beautiful wife at my side so grateful, so thankful for the experience!

When it was over I got to ask Dr. Wise all the questions I wish I had two years before. One that shocked me the most is I told him I was always out in the Sun and was worried about "melanoma." He said "Oh that's nothing I got some salve you put that on and it will clear right up." I said "No, I mean that deadly melanoma that is killing people." He responded "Yes, I know, a little dab will due you." I was shocked and looked at his assistant who was nodding her head Yes. Then Dr. Wise responded "That is the easiest of all the cancers to treat, because you can see it."

Dr. Wise gave me further instructions and had to go away again. It would be the last time I would ever see him!

Meanwhile great progress was being made on the Gann front. More and more of the inventions in Tunnel were making sense. I am a trader, who loves trading and due to personal cycles I knew I could not at this time so I threw myself into research. Which proved to be not only a pleasant distraction but a wise decision. We have talked about Tunnel, written in layers, and it can take a bit of time to reach those layers. Tunnel is a book of connections. Gann can put one part of the system in the beginning and the rest of it at the end of the book. Some feel they are going after 1 secret like, A squared + B squared = C squared, then you can go make a million dollars. Gann is a series of secrets, each one leading to the next one, that must be mastered. In other words, a succession of secrets, if you will.

For the most part I would read Tunnel, check my notebook then go think about it. I had worked out several parts of it this way, while other parts would just come to me. I recall one discovery that I woke up with, emailed myself the solution and went back to bed!

#### PHASE 7: THE TUNNEL THRU THE AIR

This book, Tunnel, is by far the best book ever written on financial markets and one of the main goals of the work you are currently reading is to help you decode it in order that you can make a success in your trading.

Here is what I believe is a golden path that others have used to make a success. W.D. Gann, George Bayer and Luther Jensen could all forecast the markets with a high degree of accuracy. This then becomes the goal of the seeker.

In order to accurately forecast one must have a cycle. Some people believe that the cycles consist of things like declination, apogee, latitude, planetary speed, etc. but that is not what the TIME cycles consist of. Specifically, what you are looking for is a High Low High Low sequence with about 10-15% inversions. In all my testing apogee etc. does not provide the High Low Sequence that is so critical to a Gann Trader.

Gann's Time Cycles have lengths, which are governed by certain measurements. They work a certain way and there is definitely a rhythm. You have to get at least one of his time cycles working to be able to forecast Highs and Lows, like Gann, Bayer, and Jensen. This is step one! Things like inversions, price etc.

are absolutely meaningless without the TIME CYCLES! Geometry? Don't touch it! Gann's true systems are less than 10% geometry and that will only work with the very advanced parts of the system.

This begs the question then, where does one find the length of repeats of these cycles? Enter the book Tunnel. Gann put all the major cycles in this book for YOU to find. He did this in order to help those that truly seek to improve their lives with knowledge. By doing so he accumulates good will which is far more important than money, and as he states in the forward "shall have my reward" (more on this natural law will be provided to the reader in this work so that they do not sabotage themselves).

Getting back to Tunnel, it's a book of connections. It's a puzzle and you are going to need to assemble the pieces to make a success. This will take you YEARS through a sustained effort. The good news is that this effort will lead you to TRUTH which will alter your life FAR FAR more than money. IMHO of all the things to do in the work, there is nothing more noble than to seek truth!

Go to the store and acquire a spiral notebook with at least 150 sheets. Write on it "Tunnel Master." Originally I had a couple of 3 foot by 2 foot white boards, which I bought at an office supply store many years ago. Then a couple of trader friends showed up with white sheets that cling to the walls. "National Brand Write On" sells 35 sheets of this on Amazon for about 22 dollars currently. I switched over to these "dry erase" as they provided a lot more room. These dry erase sheets will come in handy for making the connection that will later go into the "Tunnel Master" notebook.

Starting out with the notebook, take every invention and write down what is said about it and also the page numbers it is mentioned on.

One invention is "Marie the Angel of Mercy" which we call MAM for short. So at the top of the notebook page we would write MAM then go through Tunnel first writing the page number (page 234) and what was said about it (work was started on the new machine with all secrecy, it had already been christened "Marie the Angel of Mercy"). Next you want to find and isolate a DATE for the event. Page 233 has "Fall of 1928" then page 234 has early September 1928. So the actual date must be presumed to be early September 1928, and because Gann did not specifically provide us with a date, we can assume this to be important because Gann made us work for it. Think like this! "How would Gann hide his time cycles which all have a length of time to repeat?"

We then would go looking for the next time "Marie the Angel of Mercy" is listed. Once we find it we write down the page number, what is said, and the date or at least as close as we can get to the date using what Gann gives us. This process is repeated until all the times MAM is mentioned are put into our notebook in the above manner.

Once this process is complete on MAM we can go and do our unofficial configuring on our white board sheets. Playing around with dates, putting together, comparing and looking at the distance the planets moved, number of DAYS between mentioning etc.

Yes, dear reader, this is the road that leads one to success.

The inventions are all important, even the seemingly smaller ones like the "Pocket Radio" or "Silent Muffler."

The next phase, after all the inventions is the keywords, which are slightly less obvious at times but can be just as important. Here is a small sampling; supreme, bicycle, level, ray and Sunday. You want to

process these like inventions, writing down the page number, how the word was used and the date (if any) as not all will have dates and that is ok. As a final step also count the number of times it is used in the book, keywords are often repeated X number of times which will have a specific meaning. An example is Charity which appears 5 times in the book. This tells me it ties into a particular advanced concept where the number 5 is important, specifically where Robert Gordon was born.

This type of analysis can lead to success at finding the cycles, for Gann not only gives you the cycles but the Planets that are involved. If an airplane does not have a pilot (aviator) it is of the nature of cycles that do not use the planets. It's a higher level system.

The longitude and latitude for every city mentioned should be obtained by the seeker.

RULE; There is little, if any, "filler" in this book. If a city is mentioned its important. If a date is mentioned its important. NO EXCEPTIONS!

Poor Robert Gordon "cotton head" starts out being teased by his brother, then works his way up to "Supreme Commander." At different phases of his life, depending on what he is called, he is different things! So are the other characters.

Each name that is mentioned in the book is important. Both Gann and Jensen mention Descartes, with Gann cloaking him in the book.

Pythagoras is mentioned saying something weird about women on page 191 "there are in a woman's eyes two sorts of tears, one of grief the other of deceit." Pythagoras was a mathematician so the line is suspect. Decoded it means "two sorts of tears, one". This 2:1 ratio is the Octave, so he is saying study Pythagoras and Octaves!

When I found, what I thought was a cycle, never did I ask someone "Is this a cycle, figuring if I asked that I had no real knowledge of it." If you do not know if you have a cycle or not, you probably don't. The way to find out is easy. Your cycle will go H, L, H, L etc. with an occasional inversion (about 10% of the time). If you have a cycle that inverts 40% of the time you have coincidence. Remember the master key; you MUST have an accurate TIME cycle first, before ANY other thing will work! The time cycle must have come from Tunnel, to be one of Gann's TRUE cycles. Once you find them expect your life to begin to change! Gann's cycles will allow you to forecast and that is step one.

Gann will emphasize certain parts in the book with Capitals, and the use of words like great or gigantic, these relate to critical areas.

This work was started on Robert Gordon's 110<sup>th</sup> birthday. Certain things act as "hubs" in the book such as the 110 story building which is used in no less than 3 different calculations in the book! Another hub or tie in is the GIGANTIC attack on New York City.

Tunnel was written at a specific resonant frequency. When one matches that frequency the book literally coughs up her secrets! Although ever so slowly in the beginning, becoming faster and faster.

## PHASE 8: THE REAL KEY TO YOUR SUCCESS!

Many people come into the Gann field because they want to make a lot of money and they figure Gann will help them succeed. The real key is if the individual wants things in their life to change they have to change.

Everything in this universe has a specific resonant frequency. Even a rock sitting in the same place for tens of thousands of years has a specific measurable frequency.

Human beings also have a specific measurable frequency. Get the book "Power Us Force", by David R. Hawkins. That book is a MUST HAVE book as it proves that TRUTH has a very high vibration!

The Golden Rule is Like attracts Like; the Law of Attraction, so TRUTH attracts more truth. It is Law. TRUTH is also very high vibration (see Power Vs. Force) and Gann wrote the Truth in Tunnel. I assure you dear reader the book contains TRUTH!

Now I need to give you an example in contrast. Let's say someone offered you a million dollars, as an experiment, to live in a crack house for a month. You accept the challenge even though you have no intention of smoking crack. I doubt you would be able to make it a week. Because you and the crack smokers are all in a state of vibration, being around the negativity, the hopelessness, the confusion would begin to drag down your own vibration! Even though you have no thoughts of smoking crack you would begin to feel your own vibration spiraling down, getting lower and lower as time marches on. This downward spiral would begin affecting your first mentally, then physically. What is occurring here is the same as walking into a piano store, striking a key on a stringed piano and having the other pianos sound off. Science calls this "phenomena" sympathetic resonance.

Now most of us won't need to experiment with a crack house, but similarly our vibrations are impacted by many factors each day. An all-inclusive list would fill up many pages but the main ones are: 1) your thoughts, 2) the food you eat, 3) the amount of nutrients you acquire, 4) the people you surround yourself with, 5) the water you drink, 6) News, shows, music.

Your thoughts are by far the most critical element of all of these. You must train your thoughts to be positive. This can take some time. Napoleon Hills book "Think and Grow Rich" along with his audio "The Science of Personal Achievement" can come in handy. Also I think a study of the Law of Attraction helps.

When it comes to the foods you eat, volumes could be written. Essentially there are 3 main elements; Vitamins, Minerals and Enzymes. As stated earlier our life span should be around 120 years. When we cook our food about 116 degrees we cook out the enzymes. Therefore, eating a good portion of raw foods is helpful to our systems. Eating an all Organic diet is not enough as much of the food was grown on nutrients different soils with the vitamins and minerals long gone out of the soil. GMO MUST be avoided at all costs, reference Dr. Joseph Mercola. Microwave ovens, while convenient alter the energy structure of the food making it low vibration!

Personally I have an orchard where the fruit trees and vegetables are sprayed with Dr. Mercola's Sea Minerals. Once a fruit or vegetable is picked its energy (vibration) begins to diminish. I know it sounds crazy but it is a scientific fact. Study Kirlian Photography in relation to fruits and vegetables. A head of lettuce loses 50% of its nutrients shortly after being picked! So the stuff in the store is devoid of any

nutrients, even if its “fresh” and unprocessed. Take your food VERY seriously. Study the works of Markus Rothkranz and on You Tube “life regenerator” or anyone else you find that talks about “vibration” and food. Freshly grown, pesticide free, raw food is of the highest vibration, even higher if minerals have been added into the growing cycle. Although it is a road of its own, that will find its almost impossible to raise your vibration while eating low vibrational food. So seek to spend more eating of more nutritional food.

In my early 20's I owned a couple of pet shops. There were snakes in there and they ate mice and rats. So in order to bypass the middle man we started breeding mice and rats on our own. Strangely they would have a litter of 1 or 2. After many months of this I was at the feed store and the owner told me the reason they were not very prolific was because the feed I was using, while cheap, did not contain enough vitamins & minerals. I was paying 16 dollars a bag and he suggested I use the 50-dollar bag. I bought a bag and also some liquid vitamin/minerals. Within a month they were producing 20-22 per litter! Before long we had more than we needed and our competition, when running short, would buy from us! I call this the “lesson of the rat” and never forgot it!

A few years ago a friend of mine from India stated “There is not cure for diabetes.” All of the cures for these “incurable” diseases are already here. You just need to research them out. Diabetes is simple to cure in 2-14 days. Study the work of Dr. Joel Wallach.

Cancer? Where do I start. There are many cures already here for this but you have to research. Oxygen is BIG but there is an even better cure all. I do not do drugs; the last time I drank alcohol was 2 glasses of wine before Christmas over 4 years ago. If I had Cancer I would do what works! Get the book “Phoenix Tears” by Rick Simpson. I am not a doctor and hold no licenses in anything, I am a researcher who seeks out truth! Remember our axiom: Truth attracts more truth. Spend your time seeking out truth. Learn to judge low vibrational writing from high vibrational truth.

When it comes to water the ideal is Spring Water that has NEVER touched plastic. Putting this water into a cold refrigerator increases the structure and therefore the vibration of the Spring Water.

Fluoride? Just say NO! Avoid that stuff. All chemicals are low vibration, NO exceptions!

If you came to my house and I grilled outside some food for everyone, then I brought yours inside and sprinkled a white powdery chemical all over it, which I got from a 50-gallon barrel, what would you think? Would you eat it? Probably not. What if you asked me, “will that white chemical hurt me” and I responded “the guy that sold it to me paid for a study that found it was safe”. What would you think? And yet most do every day; trusting chemical companies that have profit motives. We are all on our own paths for sure, my goal in writing this is to help you by giving you information I feel is accurate, correct and well researched in order to make your path easier.

There are 3 things that work in tandem; the mental, physical and spiritual. For me, my spiritual bank account is every bit as important as my physical bank account.

Let's say I invited you to my house, and when you arrived I challenged you to a game of football or soccer and you accepted. We go outside and I write all the rules down on a sheet of paper and put it in my pocket. As the game starts, you broke a rule, so I stopped the game to inform you that you cannot do that as it's against the rules that I have in my pocket. Who will win that game? So in any game it's important to know the rules (LAWS) in order to win that game. Wouldn't you consider life the biggest

game of all? We have already learned through PA that people making tens of millions a year are no happier than someone making 150,000 a year. So if it's not money that makes us happy, what is it? For each of us it's a different answer. Knowing the rules (LAWS) helps you live better lives which are more fulfilling because we will be in harmony with these laws. Money can be a faithful servant but it can also be a tyrannical master depending on how well we know the rules (LAWS).

I define wealth as Knowledge, Happiness and Money. I know people who make a lot of dollars but in no way would I consider them wealthy according to my definition.

This part is being written from Panama City Beach, a far more crowded beach than Jekyll Island was but much whiter sand. Almost a pristine white which is why it's called the "Emerald Coast".

You see there is a returning flow. If you give out and freely help others you yourself will receive help when you need it. I mean, do you recall that time I told you that I woke up in the middle of the night and emailed myself the solution, then went back to bed. Where did that really come from? Why did Gann really write Tunnel, I mean he certainly did not need the money? Why is the work you are currently reading absolutely free?

Those familiar with Emerson's Essay on the Law of Compensation, often referred to by Napoleon Hill will understand. For the newcomers may I suggest "The Celestine Prophecy" by James Redfield.

I was asked yesterday if I had always been charitable, or if this was something I had recently started. The answer is that even at a very young age I would seek ways to help others. Later, when I got older and became aware of the LAWS that govern this Universe I accelerated my efforts. Later on people would come into my life and help me, in ways I once thought were impossible!

So let's say we find what we believe is a cycle. Let's say (as an Example Only) that we notice that two dates in Tunnel are 2060 days apart which is close to 3 Helio Mars revolutions, what do we do now? How can we test this? Gann's Cycles of Repetition do not have a starting point. They are based on repeat of time or length of X. Here, in this example, we believe its 3 revolutions of Mars.  $3 \times 360 = 1080$ . So we would set up a repeating spreadsheet of Mars 1080's. Meaning when Mars travels 1080 degrees, then goes to 1081 degrees we would start a new column that runs from 1081 to 2160, the next column would run from 22161 to 3240 etc. etc.

Different Instruments will respond to different cycles. Like say the DOW will respond to a particular cycle, but not the others. So we will have to test this Mars 1080 on different stocks etc. to see if they respond to it. This is what is going on; If the spreadsheet is set up correctly there will be turn repeats (vibrational repeats) when Mars hits certain degrees across your sheet. Like say Mars hits 21 degrees and you notice a High in one column, then 21 degrees you notice a Low in the next column then 21 degrees again you notice a Low in the 3<sup>rd</sup> column. That is how a vibrational repeat across time works. That is why the cycle is called a TIME Cycle, is because it has a length of time of X. Now going across, you can get anything like all Highs, 1 High and 2 Lows or whatever. The reason is the sequencing comes from a different way, specifically heading DOWN your column. Going down the column you should have High, Low, High, Low coming from your time cycle. Once this is tested out over a period of a couple of years of going down your columns you should have an inversion rate of around 10% and we have talked about this before.

Get the book "Rich Dad, Poor Dad" by Robert Kiyosaki. In it note that the rich Dad worked very hard at donating and helping others. He was able to understand and use the natural laws. In so doing he never attempted to acquire something for nothing. Also, from a statistical stand point, the book by Thomas L. Stanley provides mechanical insight, its name is "The Millionaire Next Door."

W.D. Gann died in 1955 and here we are over 60 years later studying him. Obviously the man knew something. Let's take a closer look at the last paragraph of the forward from Tunnel. "I believe this book will prove interesting and valuable to men and women in all walks of life. If it does, you will be thankful to the power that guided my hand in showing you the way to eternal truth. My object will have been accomplished and I will have my reward", signed W.D. Gann. Indeed, here was a man that again, understood and used natural law.

On another note, some people have emotional blocks that sometimes are caused by some form of abuse or neglect during childhood. If you fit this pattern you may wish to read the book (or audio) by Louise L. Hay entitled "You Can Heal Your Life". Louise is the owner of Hay House Publishing. Anything from Hay House will help you improve your life, and you may want to check into any books they offer on something called "The Law of Attraction." You see, if you really want to win this or any other game you have to know the rules (LAWS).

I have a close friend who studies with the Tibetan Monks, disappearing for weeks at a time. He confirms that the vibration on this planet is rising just as the cycles say it should. Literally you can be, do or have anything you want. The key is to raise your personal vibrational frequency to match what you want, through the Law of Attraction, then it will come into your life easily and effortlessly.

#### PHASE 9: RETIRING FROM THE TOUR

Seven years after it started I did my last gig on the world tour, I was tired and just wanted to spend time with my family. Now, years later, looking back I am still amazed at all the wonderful vibrant and enthusiastic people I met. I feel truly blessed! I was 42 years old and the tour concluded in North America. With my public seminar days over I wanted to focus on a few things. One is I wanted to get to the bottom and understand nutrition, I wanted to focus on finishing up my Tunnel decoding, I wanted to keep improving my trading, spend time with the family and keep the goodwill flowing by helping others. These things all contained my passion and still do.

The following year found me in Australia for about a month, visiting friends. A multi-millionaire I had originally heard about in 2008 invited me to lunch, which I accepted. We had lunch just South of Surfers Paradise at a fantastic seafood place where he knew the owner; he himself a delightful and confident man. We talked about many things. In conversation he offered me a million dollars a year to forecast one particular market for him. Without even thinking about it, I refused. Working strictly for money without a good will return flow is not for me, nor was it for Gann. A few years later I would again get offered what many would call a large amount and again I refused.

The following year I had a perfect trading year, which I had never had before or since. All trades were profitable but, in being completely honest one was a scratch as I managed to squeak out a 6-dollar

profit. Factoring in commissions I was slightly negative. Now here is the key as to why I brought this up. Five months of that year I did not trade. I knew if I did I would get hit with huge losses as transiting Saturn (restriction) was making an inharmonious aspect to its natal position within my chart. When that is occurring forget all about trading. I have seen real Gann Traders get torn up attempting to trade through those times.

W. D. Gann would trade in what he called “campaigns” which were periods of time that he knew would be rewarding. Furthermore, man has, a seasonal trend in which he will find profits are to be had much more readily during certain months. This varies from individual to individual and can be timed using the natal. W.D. Gann was not always trading. He did not need to and neither do conditioned Gann Traders. Specifically, for myself I always lose money in mid-February, years ago I found the cause and simply do not trade in it.

Let's go back here a couple years from this perfect trading year and take a look at some other things that were going on after I quit the public seminar circuit.

One of my goals was my health and nutrition. Through a chance encounter, at the last seminar, I met a man who could measure nuero-pathways in the brain. For those unfamiliar with what this is I will give a brief example. Let's say you do not know how to ride a bicycle up and down the peaks and valleys. In your mind there is no nuero-pathway for riding a bicycle. One day you get on a bicycle and start riding around, getting better and more confident as time goes by. What is occurring is that your brain creates and continues to build a nuero-pathway for riding your bicycle up and down the peaks and valleys. In order to build that pathway, the brain needs certain specific nutrients. If it does not get these nutrients one winds up with poorly formed or even dysfunctional nuero-pathways. The guy that I met, who is now past away, told me that after much experimentation that Dr. Mercola's Krill Oil was by far the best, for building nuero-pathways. I immediately saw the implications this would have for the Gann researcher. That was also my introduction to Dr. Mercola who has the world's #1 health site. Since then I take 2-3 a day.

In that same time frame I also found the book “Niacin”, by Abram Hoffer, so I worked my way up to 3 grams a day and found it did wonders for my own mental clarity, greatly improving concentration when it came to decoding tunnel.

The ancients believed that the gut was the key to the intuitional doorways of the mind. How many times have you heard “gut feeling” or “he has a lot of guts”? When I started working with this concept, in ways I will soon describe, the Tunnel breakthroughs started occurring faster and more insightful, convincing me that the micro-biome really is the key to intuition and higher levels of thinking, also feeling better.

The first order of business was to kill off the candida albicans, which is the result of taking antibiotics. The procedure I followed was from the book “A Miraculous Health Substance” by Marvin Robey, and as the fungus (candida) began to die off I had to take sweat baths. The next step was rebuilding with probiotics. What I found is pills are rather low doses, fermentation in the form of kefir or especially coconut water (see life regenerator on YT) was FAR more effective. What I also found is that I felt much happier-clearer in the mind and perhaps more importantly here, things just started “jumping” out of the Tunnel book at me. For more information on this see the monumental work called “Gut and Psychology Syndrome” by Natasha Campbell-McBride.

We have touched on the point the some may have “blocks” acquired in childhood, that are, to this day, holding them back. A phobia could even be considered a “block”. Fear of heights, spiders, snakes, water, small spaces, or elevators can all be quickly and permanently gotten rid of in a matter of minutes. The technique is called EFT (Emotional Freedom Technique) and once again we return to Hay House Publishing for the book “The Tapping Solution” by Nick Ortner. This technique frees one up to live a happier fuller life!

Millionaires do not think and/or behave like the rest of the public, often having eccentricities and taking the time to program themselves for success. Unfortunately, Gann cannot help you as he passed away. The individual MUST take things into their own hands, using natural Law and programming themselves for success, while doing away with old habits and patterns that have not produced success. Gann wanted it to take 10 years of effort before any real results are obtained. If you have been in this field 10-15 or more years and cannot yet forecast, you have a vibrational problem. Believe it or not this is very common. There is something holding you back, it could be in the form of a blockage from way back or a violation of natural law (like you have been trying to get information out of others without giving anything, a direct violation (which natural law will penalize you for) or perhaps you just don't really see yourself successful. Remember the two fellows who sat down and one made a success and the other did not? Had both failed I would have been to blame. It would be a couple of years after the incident that I was told exactly what happened. The man that succeeded was vibrating to success, the man that failed was vibrating to failure. The man who succeeded knew that it was really up to him to succeed. The man who failed was looking for others to make him successful which is, in fact, impossible! In my almost 18 years of helping people I think that most do not understand that they need to study how to succeed, adopting a philosophy and outlook that serves them in acquiring any goal they have. Gann is dead, studying Gann will not make you successful and I think many have found this out the hard way. You must learn how to be successful. Then you will start to better understand Gann.

Let's say you have studied success and some of the books referenced here. You have found a cycle or two and are wondering, What's the next step?

#### PHASE 10: FINDING TRUTH

Some will seek to understand how W.D. Gann's price systems work with the cycles, and if you have one of Gann's time cycles this is certainly a valuable study. I would suggest studying the Cotton Campaign and The Tunnel machines.

Another avenue that will probably appeal to some after finding their first cycle is to understand W.D. Gann's inversion solution. The Gann Traders I know for the most part believe that inversions will take a little longer to understand than price. I will tell you dear reader, in this regard, I feel strongly that the letter that Robert believed Marie dropped in Paris must first be interpreted before a success can be had with inversions. The true cause of inversions is a cycle that adds in extra pivots, from time to time, to the main cycle. Inversions are nature's way of keeping all the cycles in sync.

In my almost 18 years of helping people I have come to the conclusion that the absolute most important determining factor to your success is your own personal vibration, indeed, the most critical factor!

When one reads traditional history of this planet it is a sad narration of wars and absurd misery. This is in part due to a low vibration that the planet had been vibrating to, which I cannot get into the causes of here and now, due to space limitations. (see the must read “Power vs Force” previously recommended). The uplifting vibrations currently hitting the planet will continue. You have felt these but possibly did not know what was occurring.

Have you felt recently that there just is not enough hours in the day? Have you felt that time seems to go by faster? Well you are not alone! These feelings are a direct result of the higher vibrations that have been hitting the entire Solar System. Be aware of people outside the Gann field who talk about vibrations, or personal vibration, like Markus Rothkranz and the life regenerator on YT, they may seem “odd” to you at first but they are “in the know”, as are many others.

It has been said that truth is stranger than fiction. Truth has a different vibration to it than non-truth. Non-truth is very low vibration whereas truth is extremely high vibration, you must learn to tell the difference. Take a few moments and try to distinguish the difference. Note that nay sayers and those that oppose are Low vibrational. Truth never opposes.

The Law of Attraction is based off like attracting like. If you fear something it’s on its way! Because truth attracts truth, the more truth you know, the more truth you speak, the more REAL truth comes to you....it is LAW. Telling anything that is un-truth has the result of lowering the vibration of the individual.

Years ago, before I became fully aware of personal vibration I met a woman we will call Crazy Connie, who was, in short a con artist. Later I would be warned of such and take action to distance myself. Planetary Cycles can temporarily lower your vibration and while under such I met Crazy Connie. To the day, when the cycle was over, Crazy Connie got out of my life. As stated she was a bit of a con artist and had been for a number of years. Even though she was older than forty her parents continued to bail her out of any trouble she got into. She told me she had had 16 medical surgeries and currently had a kidney stone which she was hospitalized for, I later verified this. What we have here dear reader is natural law. Crazy Connie was indeed a con artist but by far the target of her sinister doings was herself. Because she was unaware of natural law she was only stealing from herself! Yes, indeed, in looking back Crazy Connie was her own worse victim!

This universe demands payment for everything. No exceptions! Yesterday while eating breakfast I got into a discussion with a couple waitresses. One said she just got “stiffed” by two tables she had waited on. This occurred in America where the standard tipping rate is 15% and the waitresses depend on the tip! Let’s examine what really occurred here in terms of natural law. The two groups of people who did not leave a tip got the service of the waitress for nothing. I would estimate her services were worth 5-10 dollars. Those people figured they were saving money, being frugal or whatever. A sum of 50 to 100 dollars will be extracted from them, for this, at a later date. The waitress who got “stiffed” either did something in the past to where she got something for nothing and it was being extracted, maybe even in an ongoing basis or if this was not the case the universe will pay her 50 to 100 dollars at a later date to square it. A true millionaire knows that revenge of any kind is a suckers’ game, because of natural

law. Contrast what the people did who stiffed the waitress to how the millionaire in "Rich Dad, Poor Dad" would have behaved, or how the millionaire in "The Instant Millionaire" would have behaved.

In looking back over my almost 18 years of helping people in this field I feel strongly that one's ability to truly research is an important element. Back in the 1980's a movie came out called "Indiana Jones and the Raiders of the Lost Ark". In it Dr. Jones goes after all these relics, through thick and thin. Dr. Jones had a lot of "drive" for these relics. Picture yourself as Dr. Jones (re-watch the movie if you need to) and instead of going after relics, see yourself going after knowledge! Dr. Jones always seemed to come out ahead because he had better knowledge and a higher vibration! Get it!

Well, I leave the beach next week so I want to go enjoy it on a more personal level. I sacrificed much of my personal beach time to help you on your path. This work will be distributed for free once I return and the typist types it up.

You, dear reader, have gotten something for nothing. In order to square it, you should give to your favorite charity, or do a random act of kindness for someone else. This author will refuse any compensation.

#### CONCLUSION:

The purpose of this writing is to instruct. It is different than most writings you are used to and no effort was made to change that. It is meant to work on multiple levels simultaneously. It should be read and re-read because it contains much that this author believes in valuable. It should be put down for a day, a week, a month, or a year and be re-read, as new light will dawn.

For some this work or writing will be an invaluable aid, which will lead to success and I will see you on the beaches of the world!!!
